

Marinas

Turn-key marinas built for your requirements!

Based on the Gold Coast, Superior Jetties is an Australian family-owned company with over three decades of innovation and experience in the marine industry. Superior Jetties has transformed the Australian and international markets and is considered the market leader in pontoon design, innovation and quality.

As one of the world's leading manufacturers of marinas and commercial berthing applications, Superior Jetties is known for their durable, functional, and aesthetically pleasing products. Its team of skilled professionals in design, manufacturing and installation, ensures that all products can adapt to any location, anywhere in the world. From the stunning waters of the Seychelles, to the exquisite Caribbean islands and the Hawaiian tropics, you can see Superior's enviable hold on a global scale.

Superior Jetties guarantees a 'superior' experience, placing importance on product development and continuous improvement. By choosing Superior Jetties, you can be confident that you are purchasing the best product available on the market today.

We have a marina to suit you!

With over 30 years' experience in the manufacture of high-quality marina systems and products, Superior Jetties provide a range of options tailored to your suit specific requirements. Superior Jetties is recognized as one of the world's leading manufacturers of marinas and commercial berthing applications.

Superior Jetties can also enhance your marina with the addition of the versatile, robust Ultimate Modular Docking system, stylish jet ski docks and state of the art boat lifts.

Provision for Features Including:

- Lighting/Power
- Fire Services
- Sewage Pump Out
- Fuel Services
- Custom Gangways
- Engineering
- Anchoring systems

Super Yacht Berths

Heavy Duty all concrete system for construction of Super Yacht Berths

- High freeboard to suit large vessel requirements
- Excessive deck loading allowance
- Massive all-concrete pontoons with heavy reinforcement
- Pontoon base with fully welded PE base liner system
- Large diameter pontoon to pontoon stainless steel connector system
- High individual pontoon mass provides more stability and is better against environmental forces
- Connectivity for large sized pile guides, heavy duty rubber D-fenders and mooring bollards to suit the Super Yacht requirements

Super Elite Marina System

Heavy Duty all concrete system for heavy applications

- Suitable for large scale commercial marinas and commercial applications
- Very high impact resistant, reinforced concrete deck and wall thickness provides longer overall design life
- Heavy Duty reinforcement
- Pontoon base with fully welded PE base liner system
- Large diameter pontoon to pontoon stainless steel connector bolts
- Low/zero maintenance required
- 5-sided structure allows more concrete to areas where it is structurally required
- Pontoon can handle high concentrated loads (pile guide connection, heavy fender, cleats) and transfer the loads from boats to the mooring system

Elite Marina System

Reinforced Concrete Deck Marina for commercial and domestic use

- Suitable for any single pontoon applications to large scale commercial marinas
- Heavy duty concrete pontoon arrangement constructed using reinforced concrete deck and a solid monolithic flotation system protected by a tough and flexible polyethylene skin
- Smartly finished with a customised aluminium waler that incorporates a unique press-in bump rubber fender which eliminates the need for screws
- Independent expansion and contraction from the flotation and concrete deck
- Attractive, durable, element resistant and functional

Boat Lifts/Jet Ski Docks/Ultimate Modular Docking system

Enhance your Marina

- Boat Lifts, Jet ski docks and UMD's are all designed for non-deterioration in marine environment and can all easily connect to any marina structure
- The D-Series Boat Lift utilises drive on pontoon technology, vessel can be driven straight on to the lift to provide berthing out of water
- Superior Jetties stylish Jet ski dock can connect to any pontoon, multiple docks can be connected side by side with rubber 'dog bone' connectors
- Polyethylene UMD modules are tough, UV resistant and versatile for arranging in any configurations
